Eco-DAS XIII
Ecological Dissertations in the Aquatic Sciences

Eco-DAS is a symposium for recent and soon-to-be PhDs in ecological aquatic sciences, encompassing both Limnology and Oceanography.

The main goals of this symposium are to:

- Foster sustained, cross-disciplinary interactions among top new researchers.
- Familiarize participants with research opportunities and introduce them to funding agency representatives.
- Form mentorship relationships between participants and established scientists.
- Produce highly visible publications that highlight both the research of the participants and the interdisciplinary collaborations formed during the symposium.

The 2018 symposium will be held at the East-West Center, University of Hawai‘i at Manoa, 15-20 October 2018.

Eligibility: PhD received or expected between 1 June 2017 and 1 June 2019.

Application: current resume, letter of support from current graduate or postdoctoral advisor, personal statement, and an outline for a proposed collaborative manuscript. See website: eco-das.org

Applications due: 1 May 2018

Funding provided by NSF. Eco-DAS is sponsored by the Center for Microbial Oceanography: Research and Education, the University of Hawai‘i School of Ocean and Earth Science and Technology, and the Association for the Sciences of Limnology and Oceanography.
